SUMMARY

Software Engineering student with hands-on experience delivering full-stack web and mobile applications, including a paid commercial project for a pharmaceutical distribution client. Comfortable across the stack — React, React Native, Node.js, TypeScript, and Python — from database design to production deployment. Currently pursuing CLT roles in Brazil and remote opportunities internationally.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React, React Native (Expo), Next.js, Tailwind CSS

Backend: Node.js, Express, FastAPI, REST APIs, JWT Authentication

Database: SQL, Turso/libSQL, SQLite

Tools & Platforms: Git, Vercel, Render, EAS Build, MapLibre

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer — Mapa Farma (client project) | Maceió, AL · 2026

Stack: React Native (Expo), Node.js/Express, Turso/libSQL, MapLibre

- Built a B2B CRM mobile app for a pharmaceutical distribution client, adopted by their field sales representatives for daily use.
- Implemented map-based pharmacy visualization, visit reporting, order management, and sales statistics dashboards.
- Deployed and maintained the application in production on Render with an EAS Build APK, handling debugging and uptime monitoring.

PROJECTS

Chute do Vidente | Personal project — World Cup 2026 prediction game

Stack: Next.js, TypeScript, Tailwind CSS, Node.js/Express, Turso

- Designed and built a full-stack prediction-pool (bolão) web app with JWT authentication, private groups via invite codes, and a gamified scoring system.
- Automated match scoring using the football-data.org API and implemented transactional email recovery via Resend.
- Deployed with a custom domain across Vercel (frontend) and Render (backend).

TalentMatch | Personal project

Stack: React, Node.js, JWT

- Developed a full-stack recruiting/matching platform with authenticated user flows.
- Deployed the application on Vercel (frontend) and Render (backend).

FocusDrop | Personal project — published on GitHub

Stack: React Native, TypeScript, Expo SDK 56

- Built and published a productivity and wellness app featuring Pomodoro cycles, an animated SVG progress ring, and persistent notifications.
- Implemented mood tracking, weekly statistics, and draggable routine management; covered core logic with Jest unit tests.

LANGUAGES

Portuguese: Native

English: Intermediate / working proficiency

EDUCATION

Software Engineering — Centro Universitário Mario Pontes Jucá (UMJ), Maceió, AL

2026 - 2030 (in progress)

Técnico em Informática para Internet — SENAI

2024 - 2025
